SUMMARY

To succeed in an environment of growth and excellence through hard work, research, skills, and perseverance, while continuously enhancing my knowledge and experience in a way that is beneficial at both personal and organizational levels.

AREA OF EXPERTISE

Programming:	Flutter, Dart, PHP, Java, Python, C/C++, Embedded C, IoT
Software:	Android Studio, VS Code, Arduino IDE, NetBeans, Xcode, MongoDB Compass, Adobe Premiere Pro
State Management:	GetX, Bloc, Revirpod
Operating Systems:	Windows, macOS

WORK EXPERIENCE

Flutter Developer

May 2025 – Present

Park Universal PVT. LTD, Anand

- **Cross-Platform ERP Integration:** Developed and deployed a multi-platform solution (Web, Android, iOS, and Desktop) focused on integrating proprietary software with Tally, a widely used ERP system in India.
- **Core Technology Stack:** Leveraged Flutter as the primary framework to build and maintain a unified codebase, ensuring consistent functionality and UI across all target platforms.
- **State Management Expertise:** Utilized the GetX state management approach for creating highly dynamic and scalable application structures, ensuring efficient data flow and high performance in complex ERP environments.
- **Key Responsibilities:** Implemented features for data synchronization, transaction posting, report generation, and real-time data exchange between the Tally system and the custom application.
- **Focus on Maintainability:** Designed modular, component-based architectures using GetX to enhance code reusability and simplify future maintenance and feature expansion.

Flutter Developer

Nov 2024 – April 2025

WebEarl Technologies PVT LTD, Ahmedabad

- **Project:** CricGem Application — a fantasy sports platform built with Flutter, Dart, and Firebase for Android and iOS.
- Developed a fantasy sports platform enabling users to create, manage, and participate in cricket fantasy leagues.
- Engineered the app to offer real-time data syncing, user engagement features, and seamless cross-platform functionality on both Android and iOS devices.
- Implemented robust security measures and an intuitive UI to enhance user experience and engagement.

KEY PROJECTS

Parabhakti

- Developed a Flutter-based application to centrally track temple devotee meal counts (breakfast, lunch, and dinner) across multiple states. Implemented real-time notifications to alert administrators on each update, enabling efficient coordination and accurate planning.

AVD Kitchen

- Developed a Flutter-based inventory management application that allows administrators to record daily grocery inflow in a category-wise and godown-wise structure. Integrated Firebase Cloud Messaging for real-time notifications to ensure timely updates and effective stock monitoring.

Smart Door Lock System

June 2024 – Nov 2024

- Developed a smart door lock system integrating fingerprint authentication, RFID card access, push-button control, and a Flutter-based mobile application. Implemented using Embedded C and Flutter, ensuring secure, reliable, and user-friendly access through seamless hardware–software integration.

Online Course Registration

Dec 2022 – June 2023

- Developed an online course registration system using PHP, XAMPP, and MySQL, enabling users to securely register, log in, and enroll in free courses. The system supports real-time course updates and efficient database management for a seamless learning experience.

EDUCATION

Master of Computer Applications (MCA)
Charusat University

2025 | CGPA: 8.91

Bachelor of Computer Applications (BCA)
Sardar Patel University

2023 | CGPA: 8.52
